
MEMORANDUM

TO: CIB PROTEOMICS LAB USERS
FROM: BART WEIMER
SUBJECT: CIB PROTEOMICS LAB USER ACCOUNTS
DATE: 01/09/06

As announced in a memo of November 28, 2005, in order to provide an accurate basis for decisions involving the use of equipment and computing resources in the Center for Integrated BioSystems, a system has been organized to track equipment usage electronically. This will help us organize usage of high demand equipment and better serve the USU Biotechnology Community.

Starting January 15, 2006, all CIB Proteomics Lab users will need an account to access the equipment. Each student will have his/her own account, which will be linked to the PI's account. If a user already has an account in the CIB Bioinformatics Lab, that same account can be used for proteomics equipment access. Fees will be calculated according to time used, although not all proteomics equipment will have a fee attached. Following are fees for using some of Proteomics equipments:

Typhoon Imager:	\$10 per half hour
Kodak Imager:	\$5 per half hour
Axon Scanner	\$10 per half hour

Accounts will be closed out at the end of each school year so that only active users are maintained. Please contact Dr. Dong Chen at 760-3766 (dongc@cc.usu.edu), or Kris Borecki at 760-3692 (kris.borecki@usu.edu) with questions and to open an account.
