

<u>Date/Time</u>	<u>Presenter/Title</u>	<u>Affiliation</u>	<u>Title</u>	<u>Location</u>
January 8, 2009 3:30-4:30	Dr. Kamal Rashid		Student Orientation	CIB 103
January 15, 2009 3:30-4:30	Dr. Donald A. Bryant, Ernest C. Pollard Professor of Biotechnology and Professor of Biochemistry and Molecular Biology	Dept. of Biochemistry and Molecular Biology, Penn State University <b>Cancelled</b>	Phishing for Phototrophs in Yellowstone National Park: Metagenomics and the Discovery of a 6 <sup>th</sup> Bacterial Phylum Containing Chlorophototrophs	LIB 154
January 22, 2009 3:30-4:30	Dr. Mike Holbrook Assistant Professor	Pathology, University of Texas Medical Branch, Seely Center for Vaccine Development	Immunologic Determinants of Hemorrhagic Flavivirus Pathogenicity	LIB 154
January 29, 2009 3:30-4:30	Dr. Jeffery Hall Diplomat ABVT Associate Professor	Utah State University, Utah, ADVS Department, Utah Veterinary Diagnostic Laboratory	Acute Selenium Toxicosis, The Chemical Form Causes Major Differences	LIB 154
February 5, 2009 3:30-4:30	Dr. Dirk Vanderwall	University of Pennsylvania, College of Veterinary Medicine, New Bolton Center	Equine Cloning: Applications and Outcomes	LIB 154
February 12, 2009 3:30-4:30	Dr. Jessie Trujillo Associate Professor / Microbiologist	Utah State University, ADVS Department, Utah Veterinary Diagnostic Laboratory	Immune Refocusing: A Novel Method of Elicitation of High Titer Neutralizing Antibodies in a Lentivirus Animal Model for HIV Vaccine Development	CIB 103
February 19, 2009 3:30-4:30	Dr. Stephen Mackessy Professor	Biological Sciences, University of Northern Colorado	Natural History to Novel Compound Discovery: Exploring the Venom Proteome of Snakes	LIB 154
February 26, 2009 3:30-4:30	Dr. Peter J. Hansen Professor	Department of Animal Sciences University of Florida	Growth Factors and Cytokines that Function in Maternal Regulation of Preimplantation Embryonic Development in Cattle	LIB 154
March 5, 2009 3:30-4:30	Dr. Dieter Egli, Post Doc Research Fellow	Columbia University, Dept. of Pediatric Molecular Genetics	Mediators of Reprogramming: Transcription Factors and Transitions Through Mitosis	LIB 154
March 12, 2008		Spring Break		
March 19, 2009 3:30-4:30	Dr. James J. Sejvar, Neuroepidemiologist	Div. of Viral and Rickettsial Diseases, Div. of Vector-Borne Infection Disease, Centers for Disease Control and Prevention	Clinical Manifestations of West Nile Virus Infection in Humans	LIB 154
March 26, 2009 3:30-4:30	Dr. Jeffery R. Barrow, Assistant Professor	Brigham Young University, Department of Physiology and Developmental Biology		LIB 154
April 2, 2009 3:30-4:30	Dr. Donald Schlafer Professor of Comparative Obstetrical and Gynecological Pathology	Cornell University		LIB 154
April 9, 2009 3:30-4:30	Dr. Brian Gowen Research Assistant Professor	Utah State University, ADVS Department		LIB 154
April 16, 2009 3:30-4:30	Dr. Bradley Cairns, Associate Professor, Howard Hughes Medical Institute	Department of Oncological Sciences, Huntsman Cancer Institute, University of Utah		LIB 154

Understanding the molecules of life
